About Me

I am a dedicated Software Engineer and Mobile App developer with one year of experience building high-quality, responsive software. Known for delivering projects on time, I excel in transforming complex requirements into seamless user experiences. Passionate about innovation, I stay updated with industry trends to ensure optimal solutions.

Skills

- Flutter
- Dart
- Node Js
- Java
- JavaScript
- Firebase
- MySQL
- MongoDB

Projects

- Intelligent Video Surveillance System using Deep Learning** 2023-2024
I developed an AI-based app using Flutter for real-time anomaly detection and Firebase for backend services. A Flask server connects the app with AI models, ensuring seamless and efficient surveillance.
- e-Store** 2023-2024
A Flutter mobile application for local electro shops facilitates the sale of electronic
- Instagram Clone** 2023-2024
Flutter hybrid Mobile App
- Study Buddy Application** 2023-2024
Study Buddy is an Android & iOS app developed in Flutter to enhance collaborative learning by connecting students in virtual study groups, enabling real-time chat, resource sharing, and quiz creation using Firebase Backend.
- QSR Flutter Hybrid Mobile App with My SQL lite** 2024
Developed QSR, a Point of Sale mobile application for seamless offline and online sales management utilizing Bloc for efficient state management and robust database synchronization

Experience

- Flutter Developer** 2024
Eratech
As a Flutter Developer, I develop mobile apps by following UI/UX designs, integrating APIs, and organizing app structures based on design patterns. I deliver efficient, scalable, and feature-rich applications.
- Freelancer** 2023--2024
Essay Shark

Interests

- Sports:** Cricket, Swimming, Badminton
- Gaming:** COD, blur, Other multiplayer

Education

Comsats University
Bachelor of Software Engineering 2020-2024
CGPA: 3.40

Kips College
Fsc Pre Engineering 2018-2020
